

$$\left(\frac{1}{2}x + 3\right)(6x - 1) > 0$$

$$\bullet \frac{1}{2}x + 3 > 0 \Rightarrow \frac{1}{2}x > -3 \Rightarrow x > -6$$

$$\bullet 6x - 1 > 0 \Rightarrow 6x > 1 \Rightarrow x > \frac{1}{6}$$

$$x < -6 \vee x > \frac{1}{6}$$
